Click On “Get Started”

Go And select “Create an Apple ID” and click “Continue

Developer Apple Developer Registration

Progress bar: Apple ID (selected), Personal Profile, Professional Profile, Legal Agreement, Email Verification

Do you have an existing Apple ID you would like to use?

☒ **Create an Apple ID**
If you have not registered as an Apple developer or do not have an iTunes, Apple Online Store or MobileMe account, you will need to create an Apple ID.

☐ **Use an existing Apple ID**
If you have already registered as an Apple developer or have an iTunes, Apple Online Store or MobileMe account, you can use your existing Apple ID to sign in.

Note: If you intend to enroll in a paid Developer Program for business purposes, you may prefer to create a new Apple ID that is dedicated to your business transactions and used for accounting purposes with Apple. If your Apple ID is associated with an existing iTunes Connect account, please create a new Apple ID to avoid accounting and reporting issues.

What is an Apple ID?
You will use your Apple ID to access certain information and resources, or to register for an event.

Fill in your email, password and security information Carefully

3 steps 15 process

 Developer

Apple Developer Program Enrollment

Enroll in the Apple Developer Programs

1. Register as an Apple Developer

If you have not already registered as an Apple Developer, we will walk you through the process so you can complete and submit your enrollment.

2. Select Your Programs

Once you have registered as an Apple Developer, you will select a Program (or Programs) based on the platform you wish to develop for.

3. Complete Your Purchase

After purchasing your Program, you will receive an activation email within 24 hours that provides information on how to access your Program resources.

Technical Requirement:
You must have an Intel-based Mac running Mac OS X Snow Leopard or later to develop Mac OS X and iOS apps for the App Store.

Choose to use your existing Apple Developer ID and click 'Continue'

Are you new or a registered Apple developer?

New Apple Developer

- ☐ I need to create a new account and Apple ID for an Apple Developer Program.
- ☐ I have an Apple ID I would like to use for my enrollment in an Apple Developer Program.

Existing Apple Developer

- ☒ I'm registered as a developer with Apple and would like to enroll in a paid Apple Developer Program.
- ☐ I'm currently enrolled in iOS Developer Program or Mac Developer Program and want to add an additional program to my existing account.

Note: If you intend to enroll in a paid Developer Program for business purposes, you may prefer to create a new Apple ID that is dedicated to your business transactions and used for accounting purposes with Apple. If your Apple ID is associated with an existing iTunes Connect account, please create a new Apple ID to avoid accounting and reporting issues.

Fill the form and click SignIn

A screenshot of the Apple Developer sign-in page. The page has a dark header with the Apple logo and the word "Developer". The main content area is light gray and contains a white sign-in form. The form has a title "Sign in with your Apple ID" and a subtitle "Enter your Apple ID and Password". It includes input fields for "Apple ID" (containing "gustavo@codecrop.com") and "Password" (masked with dots). There is a "Forgot Password?" link and a "Sign In" button. To the right of the form, there is instructional text and a "join now" link.

Certificate, Device Registration And Profiles

Sisoft Technologies Pvt Ltd

SRC E7, Shipra Riviera Bazar, Gyan Khand-3, Indirapuram, Ghaziabad

Website: www.sisoft.in Email: info@sisoft.in

Phone: +91-9999-283-283

Profiles “code signing identities”

- Development profiles-

These are tied to specific devices, so the app can only run on those devices

- Distribution profiles-

These are used to sign your app before you submit it to Apple for approval. They contain no device-specific information, but you can't use them to install apps on any device yourself, because Apple still has to sign the app after the approval process

iTunes Connect

- iTunes Connect is the portal you'll use to submit your apps
- This is where you'll register a new app, enter the app's description and screenshots, choose the price, and configure game center and in-app purchases
- This is also the portal you'll use to agree to new contracts, set your financial data (so you can bank that profit) and check your sales

Lets Start

The screenshot shows the Apple Developer website. At the top, there's a navigation bar with links for Technologies, Resources, Programs, Support, and Member Center, along with a search bar. Below this is a dark blue header for the 'iOS Dev Center' with sub-links for 'iOS Dev Center', 'Mac Dev Center', and 'Safari Dev Center'. A user is logged in as 'Hi, Guest' with links to 'Register' and 'Log in'. The main content area has a prominent 'Log in to get the most out of the iOS Dev Center.' message with a 'Log in' button highlighted by a red arrow. Below this, the page is divided into three sections: 'Development Resources' (containing 'Documentation and Videos' and 'Featured Content'), and 'iOS Developer Program' (containing 'App Store Review Guidelines' and 'App Store Resource Center').

Certificate Assistant--->Request a Certificate From a Certificate Authority

Save to disk

A screenshot of a macOS-style window titled "Certificate Assistant". The window has a light gray background and a title bar with three colored buttons (red, yellow, green) on the left. The main content area is titled "Certificate Information" and contains the following elements:

- A text box with the instruction: "Enter information for the certificate you are requesting. Click Continue to request a certificate from the CA."
- A "User Email Address:" label followed by a text field containing "gustavo@gustavo.eng.br".
- A "Common Name:" label followed by a text field containing "Gustavo Ambrozio".
- A "CA Email Address:" label followed by an empty text field.
- A "Request is:" label followed by three radio button options:
 - ☐ Emailed to the CA
 - ☒ Saved to disk
 - ☐ Let me specify key pair information
- A "Continue" button at the bottom right.

Two red arrows are overlaid on the image: one points to the "Saved to disk" radio button, and the other points to the "Continue" button. In the background, a faint, large watermark of a certificate is visible.

Development | Distribution | History | How To

Create iOS Development Certificate

The Development Certificate is used to sign a provisioning profile and associate a developer to a registered device. You may have only one active Development Certificate. To learn more, visit the [Certificates](#) section of the [Development Overview](#).

How to create a development certificate:

1. Generate a Certificate Signing Request (CSR) with a public key
 - In your Applications folder, open the Utilities folder and launch Keychain Access.
 - Choose Keychain Access > Certificate Assistant > Request a Certificate from a Certificate Authority.
 - In the Certificate Information window, enter or select the following information:
 - In the User Email Address field, enter your email address
 - In the Common Name field, enter your name
 - In the Request is group, select the Saved to disk option
 - Click Continue.
 - The Certificate Assistant saves a Certificate Signing Request (CSR) file to your Desktop.
 - The public/private key pair will be generated when you create the Certificate Signing Request (CSR) if you use the Key Chain Assistant to create the CSR.
2. Submit the CSR through the Provisioning Portal.
 - Click the Development tab
 - Upload the certificate by choosing the file
 - Click Submit

Need To Register An App ID

“New App ID”

- an app ID is a combination of a 10-character “seed” prefix generated by Apple, and a bundle ID created by you. Together they create a unique identifier for your app

A screenshot of the Apple Provisioning Portal interface. The left sidebar contains a navigation menu with links: Home, Certificates, Devices, App IDs (highlighted), Provisioning, and Distribution. The main content area is titled "Create App ID" and includes tabs for "Manage" and "How To". It contains three sections: "Description" with a text input field containing "CuteAPult" and a note about special characters; "Bundle Seed ID (App ID Prefix)" showing a masked team ID; and "Bundle Identifier (App ID Suffix)" with a text input field containing "com.codetrop.cuteapult" and a note about reverse-domain naming. At the bottom right are "Cancel" and "Submit" buttons. Three red arrows point to the "App IDs" menu item, the "Description" input field, and the "Submit" button.

Provisioning Portal [Go to iOS Dev Center](#)

Manage **How To**

Create App ID

Description

Enter a common name or description of your App ID using alphanumeric characters. The description you specify will be used throughout the Provisioning Portal to identify this App ID.

You cannot use special characters as @, &, %, * in your description.

Bundle Seed ID (App ID Prefix)

Your Team ID [REDACTED] will be used as the App ID Prefix.

Bundle Identifier (App ID Suffix)

Enter a unique identifier for your App ID. The recommended practice is to use a reverse-domain name style string for the Bundle Identifier portion of the App ID.

Example: com.domainname.appname

- Your screen should look something like snap on next page
- Click “Use for Development”

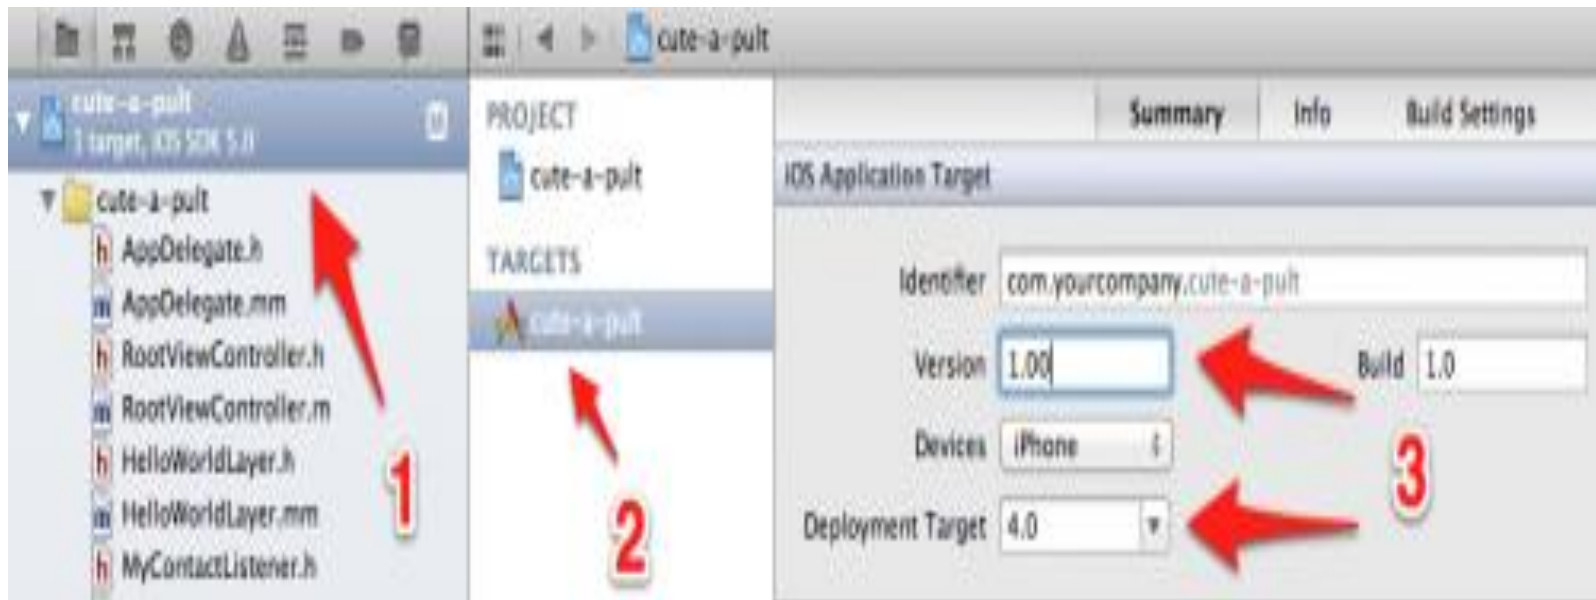

Xcode will ask you for your credentials

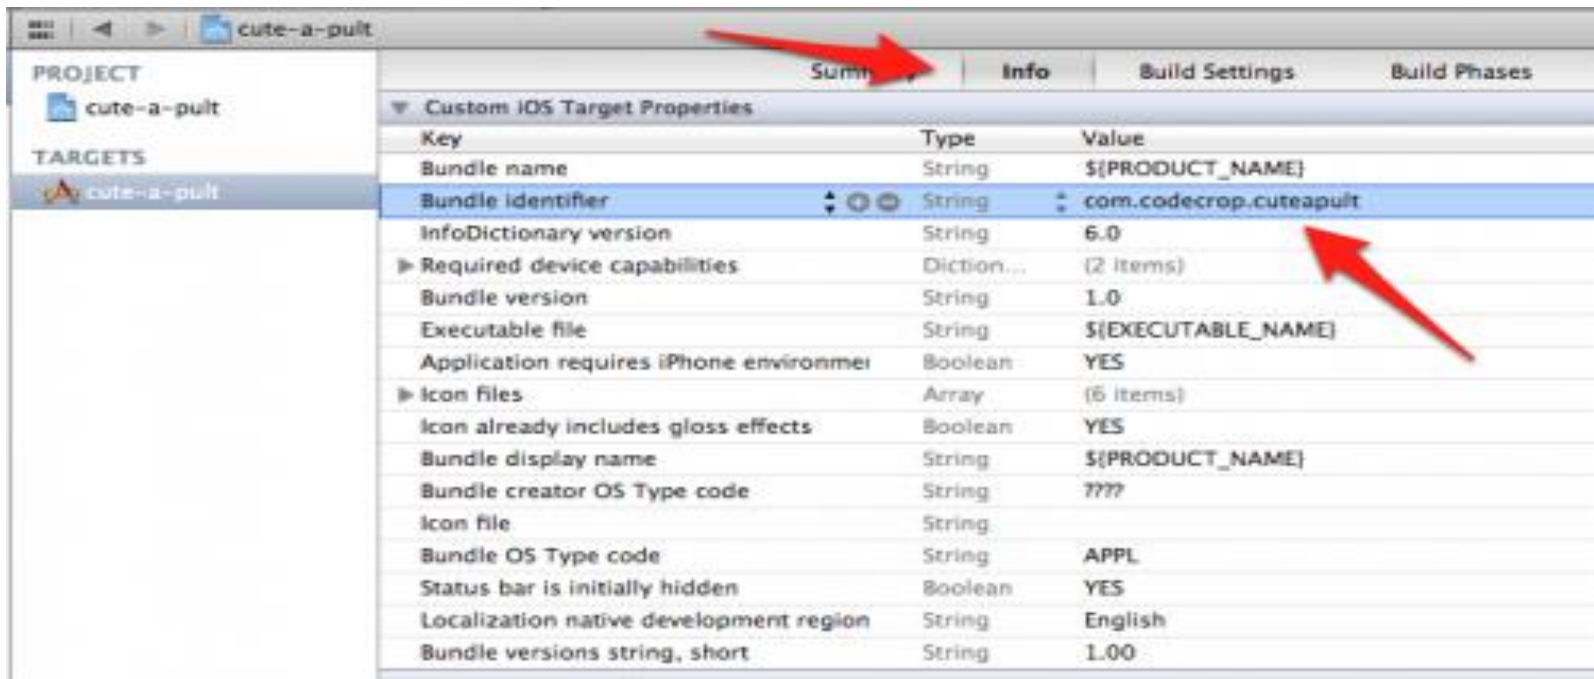

Open the project

- then click on the target
- and fill out the app version and deployment target

bundle identifier

- click the “Info” tab
- change the bundle identifier
- same bundle identifier you used for the App ID you registered in the Provisioning Portal

Code signing identity

- Open build setting>code signing identity
- Choose provisinging profile with same bundel identifier

You are good to go

cute-a-pult.xcodeproj

Build cute-a-pult: **Succeeded** | Today at 8:27 PM

No Issues
